## Gambler's Chance

Buying without seeing is like depending upon luck. If you get what you think you'll get, you win. If you don't, you lose. Pictures and descriptions in catalogs, no matter how faithfully executed, cannot tell you the exact quality of the article. You must see it to know its real merits.

If your local dealer were to sell you on the same plane as the mail order house and you found the quality just a little below your expectations, you would make him replace the article with something better. But buying blindly you usually take what you get and hope for better luck next time.

Why not be fair with your local merchants and help them to provide you with honest quality at right prices? Your undivided patronage will enable them to improve their stocks.
